(54) Title: VERTICALLY ORIENTED SEGMENTED DISPLAY SYSTEM

(57) Abstract: A segmented display system in which the display devices are arranged in a N x 1 array is described. The segmented display system includes a plurality of projection devices that each project a portion of an image on a corresponding one of the display devices in the N x 1 array. Distortion at the seams between display devices in the N x 1 array are minimized by aligning each projection device using a lens mounting based on the position of such projection device in the N x 1 array.

For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.
